

Heroes of the Past is a client centered company that is anxious to help you discover your Family's History. While we are working together, you will be in the driver's seat!

Our goal is to find the details of your family's lives, then use details from history and give you a complete picture of who your ancestors were.

If your family is from all parts of the United States, that's OK. We have a network of Family Historians throughout the US to help gather any records that might be needed. Let us help you discover your family's legacy!

Our Services

Family History research – We can solve tough problems in your family's history, and help you overcome those “brick walls.” We find hidden sources, do complex analysis and then include a detailed report with citations, digital images, and observations about your ancestor's lives written in *plain English* that anyone can understand.

Document Retrieval – We know the courthouses, libraries, and archives in Texas and can get documents that can be found only in those locations.

Family Histories – We can create a book about your family or a family member. We do not write fiction, but take the facts and research done on your family, add our knowledge of social history and create a story about your family that can be shared with loved ones.

Individual Coaching – Want to build a family tree but don't know where to start? We offer individual coaching at a location of your choice (online/30 miles from Rockwall, TX).

Speaking/Training – Heroes of the Past can provide speakers for your group or conduct workshops for your organization. Our staff has many

The speaker had good personal examples, handled many questions, and gave me lots of encouragement...

Gorgas Paulsen

years of experience researching, writing and delivering presentations. We can prepare one for you, or you can choose from our list of already prepared topics. Whether you need a 1 hour presentation or an all day workshop, contact us for information on making your event a success!

Digitization – Many of us have family memories on film or as photos. Let us protect your memories! We offer digitization of 8mm and Super 8 film reels, VHS video tapes, 35mm slides and negatives, and photographs. Call us or see our website for more information.

Our Experience

Our staff spends many hours keeping up with the latest advances in researching family history. Staff members regularly attend workshops, seminars, institutes, and sharpen their skills researching for new presentations. One staff member even won the Professional Manuscript Writing Award from the Texas State Genealogical Society!
